

Business Analyst at Numatic International Ltd, Chard

About the role:

As a Business Analyst in Numatic you will be using your engagement, process design and analytical skills to support the design, delivery and support of our business' technology solutions.

The role will be varied and interesting, where you will act as a key interface between the business teams, the broader IS team and our 3rd party providers. We are currently going through a period of change and as a result you will be involved with broad range of projects and technologies; being responsible for the alignment of these to business objectives, technology principles and customer goals.

Duties and Responsibilities:

- Collaborate with stakeholders to understand, define and agree requirements that are aligned to business and technology strategies.
- Use process and data analysis techniques to form robust recommendations to drive strategic and operational improvements.
- Validate end to end and complex solution designs using process modelling techniques.
- Undertake cost benefit analysis of proposed solutions, ensuring that associated impacts are widely understood.
- Creatively present ideas to seek collective agreement to solutions, including to senior management.
- Produce written documentation to support solution designs and enhancements in line with documentation standards.
- Proactively identify risks and issues; manage and escalate accordingly in line with governance processes.
- Understand the impact of technology changes within the business to help prioritise changes and mitigate challenges.
- Support the user testing and deployment of changes made, particularly to help resolve issues.
- Contribute to the broader change agenda with the IS Team.
- Support knowledge sharing within the department.

About you:

- Relevant knowledge through proven work experience in a similar Business or Information Technology position.
- Demonstrated ability to be an effective interface between business and technology teams; being able to understand and communicate both technical and business challenges.
- Proven delivery to a high standard against commitments.
- Experience in defining requirements and delivering to agreed scope, whilst staying focused on business outcomes.
- Strong stakeholder management experience, with excellent and creative engagement/presentation skills.
- Use case mapping, process modelling and cost benefit analysis skills.
- Understanding of how core applications within a business interact and the challenges that this presents when designing new solutions.
- Robust understanding of Sales, Financial, Manufacturing and Supply Chain business process integrations.
- Strong commercial awareness.
- Business readiness and implementation.
- Experience supporting User Acceptance Testing and business validation activities
- Ideally you will have agile delivery experience
- Strong functional knowledge and delivery experience in one or more of the following enterprise capabilities:
 - Digital – web, mobile
 - Customer Relationship Management (CRM)
 - Enterprise Resource Planning (ERP),
 - Product Lifecycle Management (PLM),
 - Human Resource (HR).
 - Oracle E-Business Suite (EBS) experience.
 - Design Thinking
 - DevOps/DevSecOps

Salary: £35,000 - £45,000 dependant on experience
